WEATHER OF CONCERN

Weather of Concern

- Wet pattern returns Wednesday with a series of storms that will impact California into early next week. Snow levels should lower into the foothills by the end of the week. Be prepared for flooding concerns and hazardous winter travel over mountains.
- Use this period of dry weather, lasting through Tuesday, to prepare for another bout of wet weather forecast to return to Northern California and parts of Southern California by mid next week.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

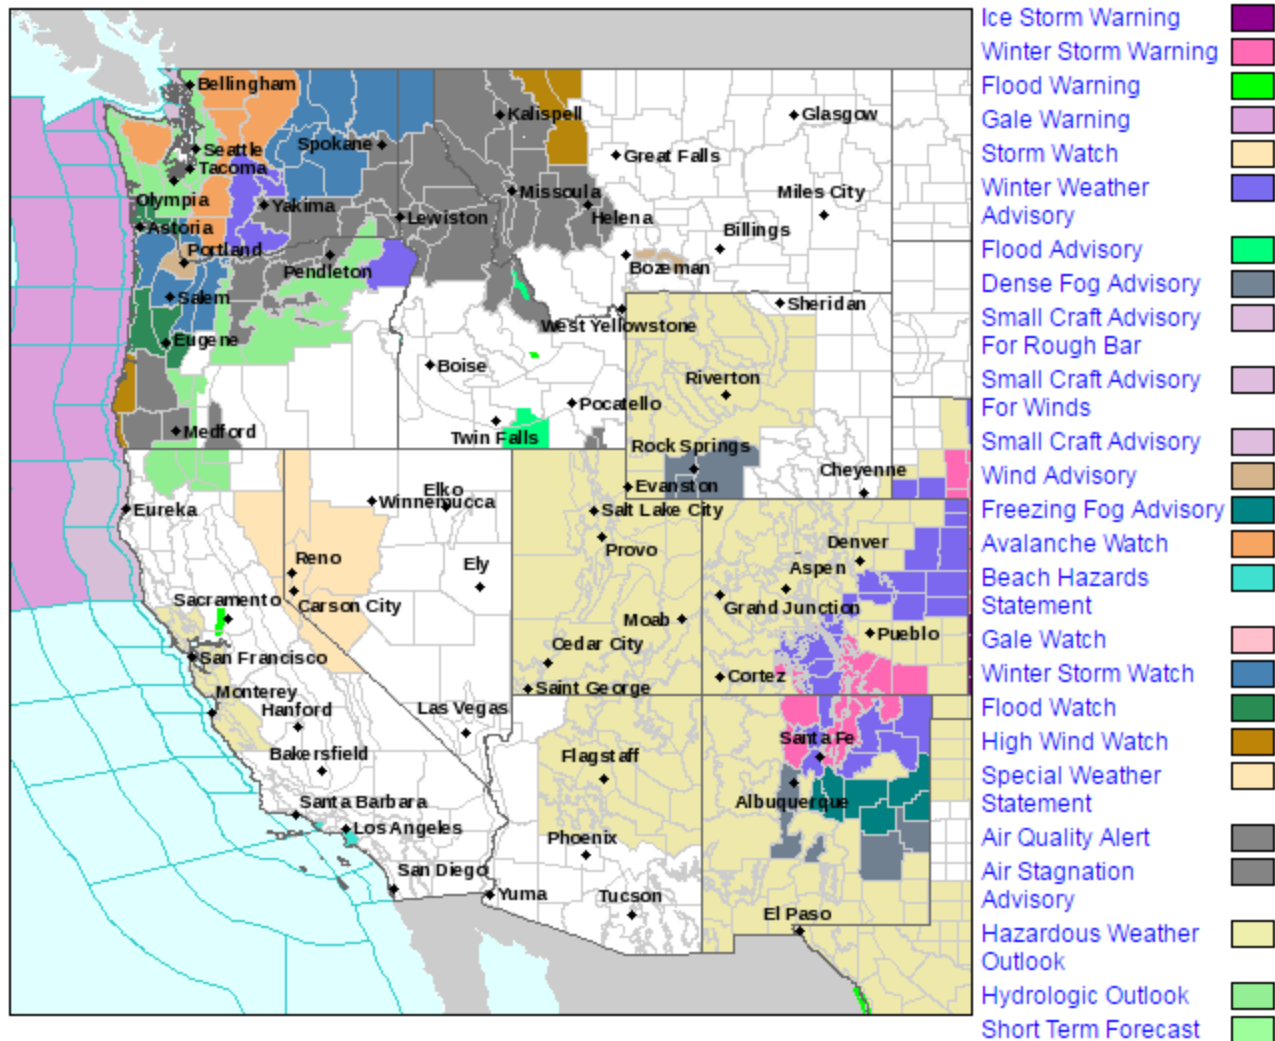

NORTHERN CALIFORNIA

Fairly dry conditions through tomorrow. A series of storms will begin Wednesday and continue into early next week. Use these dry days to prepare now for another extended wet pattern with renewed flooding and mountain snow concerns. Light rain arrives overnight between Tuesday and Wednesday with the brunt of the storm impacting the area Wednesday morning through early Thursday morning. Rain amounts in the valley will range from a half inch up to 2 inches up to 3 inches in the foothills. Snow levels will be high initially but lower below pass levels on Wednesday afternoon/evening between 5000-6000 ft. Snow levels lower towards the foothills by Thursday. Snow amounts along the Sierra will range from a few inches up to a foot or more at the passes. The Interstate 5 corridor should only see a couple inches. Breezy winds possible in the valley with gusty winds over mountains.

SOUTHERN CALIFORNIA

Offshore flow and mild weather will continue through the middle of next week. Cool and unsettled weather with increasing chances of rain and mountain snow can be expected late next week as a couple of low pressure systems affect the region. The first storm will roll through the area Wednesday night and Thursday. Rain will impact San Luis Obispo/Santa Barbara counties Wednesday evening through early Thursday morning and Ventura/Los Angeles counties Thursday morning with scattered showers prevailing through Thursday evening. After a lull Thursday night, a second storm will move on through Friday and Friday night with scattered showers possible through the day on Saturday. This next system looks a bit more potent.
